

FLOAT DOCK® WATER EDUCTOR

The New Floating Water Eductor by Fol-Da-Tank® Co. is the economical solution to siphoning water from previously inaccessible water sources. The cast aluminum structure is rugged yet light weight. The purpose built optional float dock eliminates the need for buoys and ensures the screen will remain below the surface of the water and away from mud, rocks and debris. Connections are 2.5" NST inlet and 5" STORZ outlet.

COMPLETE UNIT WITH FLOAT SHOWN IN AND OUT OF WATER

Complete Unit w/Float
Part # EDUCFL

Eductor w/no float
Part #EDUC
Part #FDSF

Float Mounting Bracket
Part #EDUCFMB
